CUDERM-LOGIS-PRINTER INSTALLATION MANUAL V1.0

Cuderm-Logis-Printer Prerequisites:

Local Printer must be setup to print without security(NO SECURE PRINT WITH CODE)

The Orientation of the printer must be set to print in Landscape.

Step 1.

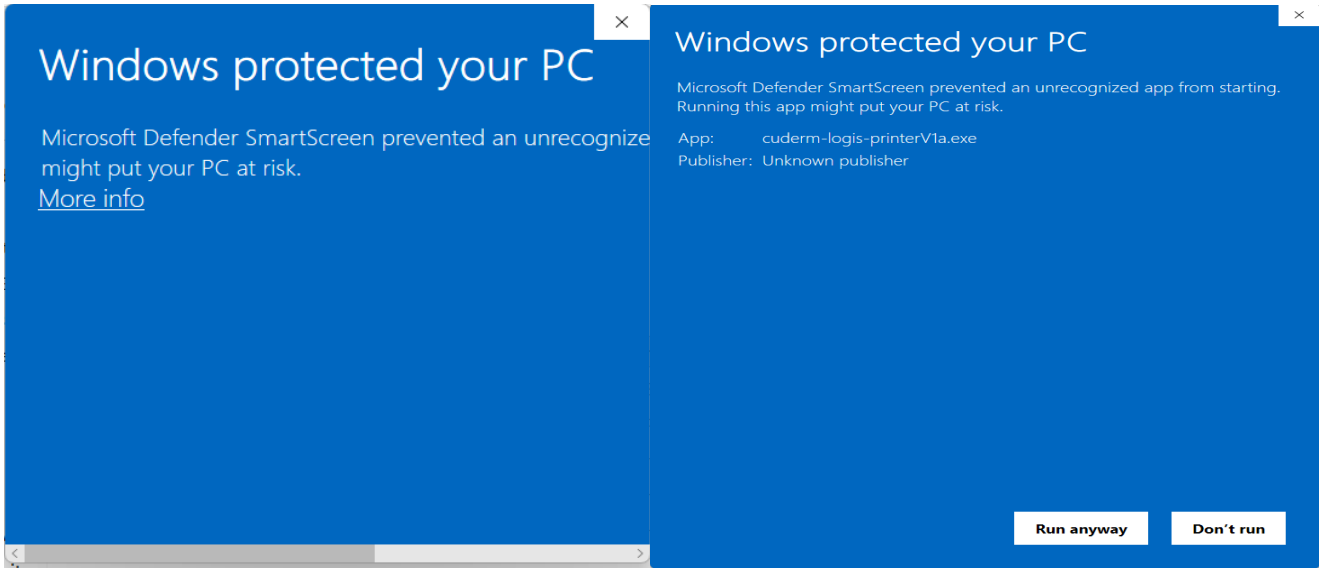
Download the Cuderm-Logis-Printer from github:

https://github.com/lindescpb/CUDERM-PRINT-WATCHER.git

Step 2.

Run the cuderm-logis-printer.exe

You will be presented with a Microsoft Defender SmartScreen window. Please click More info and click the Run anyway button. The reason for this warning is because microsoft windows does not recognise the application as a verfied app.



Step 3:

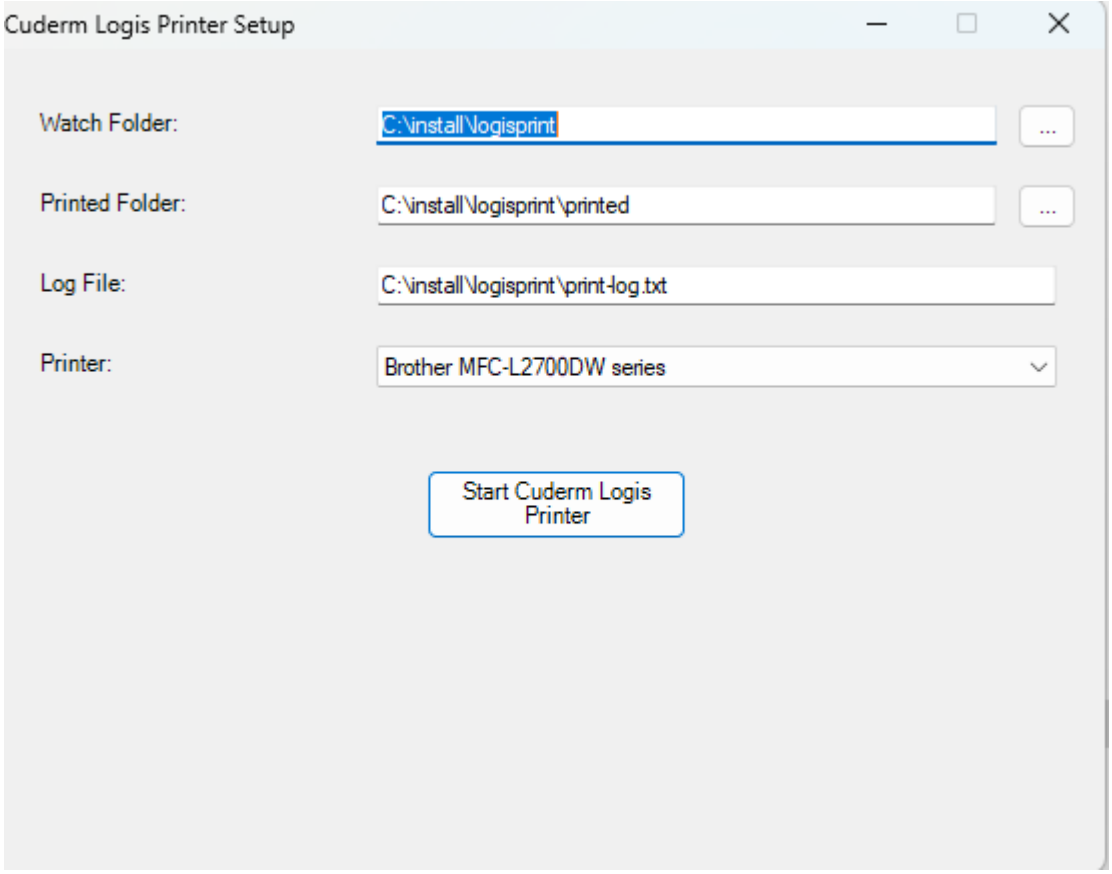
Here you must select or specify the following:

Watch Folder – where new text files will appear

Printed Folder – where processed files will be moved

Log File – location for the activity log

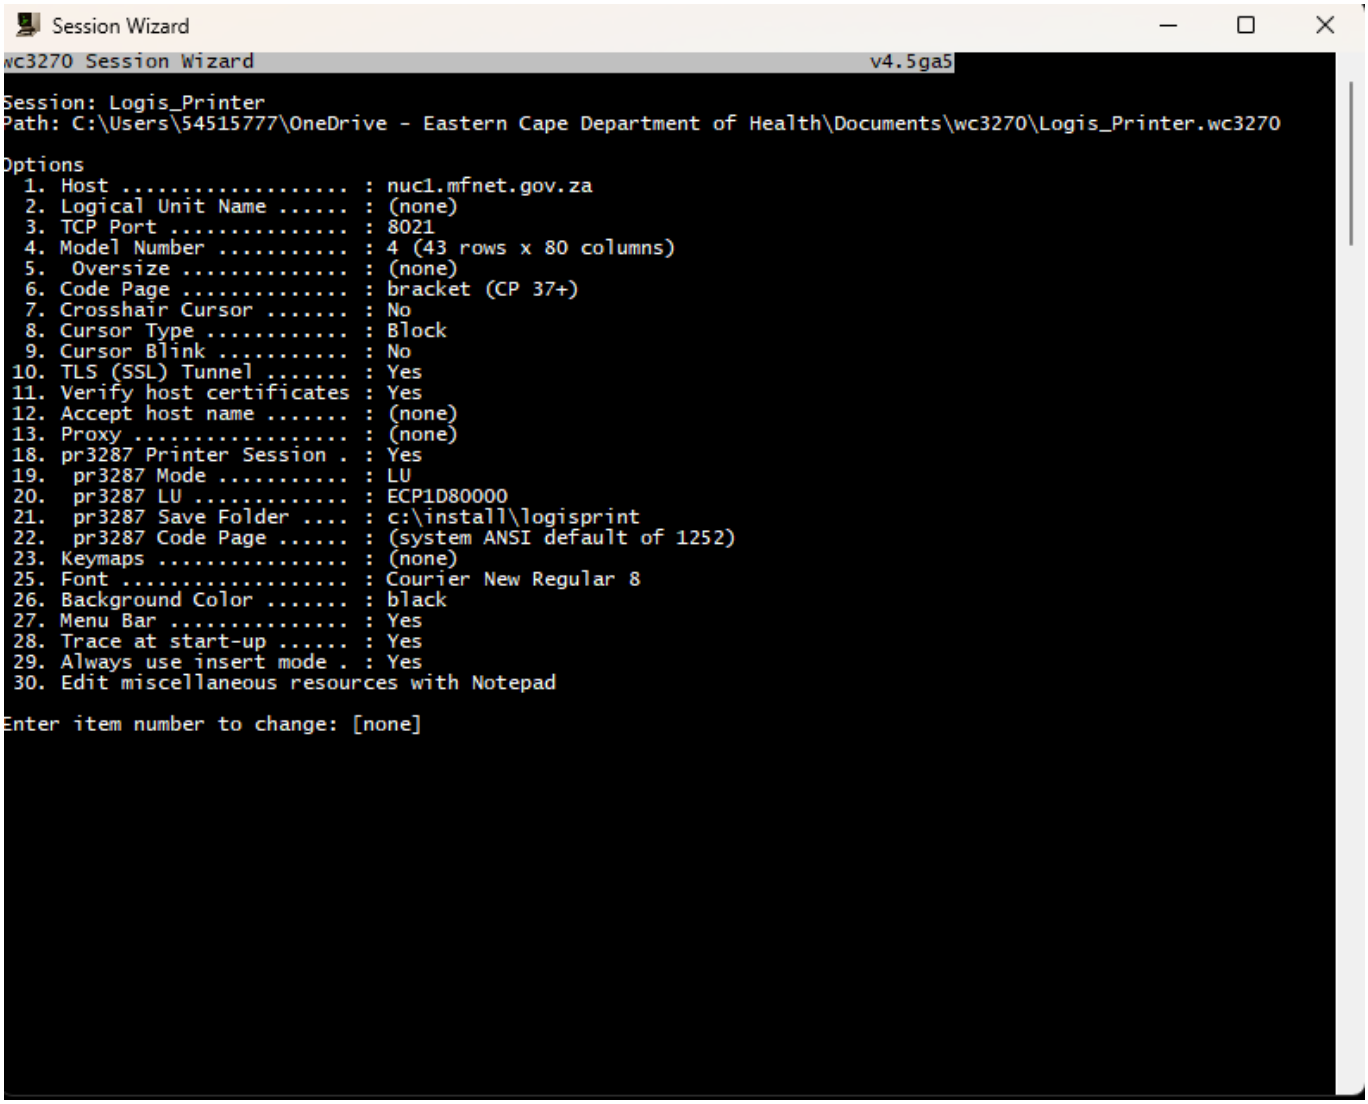
Printer – your local printer



Please note that the watch folder must be the same folder specfied in your wc3270 printer session and all other folders(Printed Folder, Log File Folder) must exist else there will be errors.

Once all fields are populated click the Start Cuderm Logis Printer button.

Please see image below



Session Wizard
wc3270 Session Wizard v4.5ga5
Session: Logis_Printer
Path: C:\Users\54515777\OneDrive - Eastern Cape Department of Health\Documents\wc3270\Logis_Printer.wc3270
Options
1. Host ..... : nuc1.mfnet.gov.za
2. Logical Unit Name ..... : (none)
3. TCP Port ..... : 8021
4. Model Number ..... : 4 (43 rows x 80 columns)
5. Oversize ..... : (none)
6. Code Page ..... : bracket (CP 37+)
7. Crosshair Cursor ..... : No
8. Cursor Type ..... : Block
9. Cursor Blink ..... : No
10. TLS (SSL) Tunnel ..... : Yes
11. Verify host certificates : Yes
12. Accept host name ..... : (none)
13. Proxy ..... : (none)
18. pr3287 Printer Session . : Yes
19. pr3287 Mode ..... : LU
20. pr3287 LU ..... : ECP1D80000
21. pr3287 Save Folder .... : c:\install\logisprint
22. pr3287 Code Page ..... : (system ANSI default of 1252)
23. Keymaps ..... : (none)
25. Font ..... : Courier New Regular 8
26. Background Color ..... : black
27. Menu Bar ..... : Yes
28. Trace at start-up ..... : Yes
29. Always use insert mode . : Yes
30. Edit miscellaneous resources with Notepad
Enter item number to change: [none]

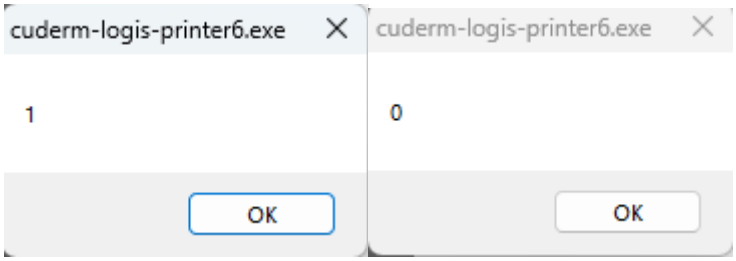
Step 5:

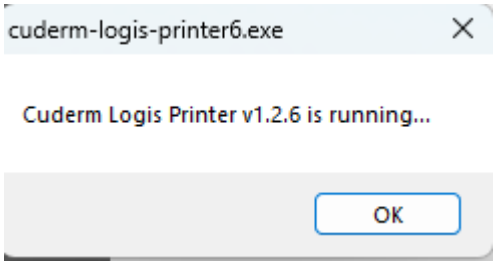
Please click OK button on the next three validation/output and success windows:

These pop-ups are not error messages or validations. They are simply PowerShell showing the internal result of the setup window ($form.ShowDialog()).

- 1 means the user clicked **OK** (Start button)
- 0 means the window was closed or cancelled

In a compiled .exe file, these internal results sometimes appear as unwanted message boxes. They have no impact on the functionality of the application.





The application is now running and will watch the specified folder for text files to process and print.
